PROFESSIONAL SUMMARY

Python developer and ISE graduate (RYMEC, 2026) with hands-on experience building web applications using Flask and Django, and professional internship experience at Alcatel-Lucent Enterprise. Developed backend systems, REST APIs, and automation scripts in Python. Comfortable working across the full stack with React.js and PostgreSQL. Seeking a junior Python developer or software engineer role where I can contribute to backend systems and grow with a product team.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, C++

Frameworks & Libraries: Flask, Django, React.js, REST API, Bootstrap

Databases: PostgreSQL, SQL

Developer Tools: Git, GitHub, Linux, VS Code, Postman

Concepts: OOP, MVC Architecture, API Development, Debugging, Memory Optimization

EXPERIENCE

Alcatel-Lucent Enterprise (ALE) — Software Engineering Intern | Feb 2026 – Apr 2026

- Identified and fixed a display logic bug in BGP/EVPN Route Type debugging (RT1–RT6) by implementing an index-based check to correctly differentiate debug rt and debug rt-detail output views
- Detected and documented 500+ memory leaks per process across BGP, Service Manager (svcmgr), and DHCPv6 using Valgrind on a live CMM board, producing structured reports to support the team's remediation backlog
- Traced inter-process communication across AOS architecture modules (CMM/NI, CSLIB, HAL) to assist senior engineers in root cause analysis of networking defects
- Collaborated with cross-functional engineering teams using Perforce version control, contributing to AOS debug builds with custom compiler flags (VALGRIND=1, DEBUGBIN)

EDUCATION

Bachelor of Engineering – Information Science & Engineering

Rao Bahadur Y. Mahabaleswarappa Engineering College, Ballari (2022 – 2026)

Percentage: 85.17%

PROJECTS

KRYPTON CHATBOT – Telegram Chatbot [Github](#)

- Built a fully async Telegram chatbot in Python using Telethon and the Telegram Bot API, integrated with a locally hosted Ollama LLM for AI responses
- Designed and implemented a SQLite database with 6 tables handling chat history, user registration, message forwarding, and a friendship ranking system
- Developed a friend suggestion algorithm using weighted interaction scores and mutual connection analysis across registered users
- Added multi-language AI response support for 7 Indian languages including Kannada, Hindi, Tamil, and Telugu

EVENTURE – College Event Management System [Live-Link](#)

- Co-developed frontend for a MERN stack event management platform deployed and actively used during college tech fest by organizers and 100+ students
- Designed end-to-end UI/UX in Figma and implemented responsive React.js components for event creation, registration, scheduling, and participant tracking
- Collaborated with backend team integrating REST APIs into frontend workflows for real-time event and participant data
